

A landscape type has been added to the lineup of new pop color blinds popular with five fabric products.

## Release of New pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE”

Colorful slats in 30 colors! Adoption of heat-shield-coated slats with a high energy-saving effect

Released on July 4

On July 4 (Monday), the TACHIKAWA CORPORATION will release an aluminum venetian blind new pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE”, as an addition to the popular 5-fabric 30-color new pop color series. Enjoy total coordination by selecting your favorite design and color from six products depending on the design, size, and opening/closing method of your window.

### “Venetian blind” added to the New pop color series

The new pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE” is a colorful high-function fabric series, available in 30 colors and five products: Roll screen, vertical blind, pleated blind, Roman shade, and curtain. A new pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE” (also available in 30 colors) has been added to the lineup.

### New “TACHIKAWA VENETIAN BLIND STANDARD TYPE” palette series ideal for creating cute windows

The new pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE” features items with similar parts colors selected, and a “TACHIKAWA VENETIAN BLIND STANDARD TYPE” palette series where the color of the slats (30) and parts (8) can be freely selected. You can have fun creating your own cute blind.

### High energy-saving blind achieved by adopting a “heat-shield-coated slat”

By adjusting the angle of the slats of a blind, the view from outside can be shut out and incoming light controlled, thus helping save energy. The new pop color series “TACHIKAWA VENETIAN BLIND STANDARD TYPE”, available in 30 colors, adopt “heat-shield-coated slats” to suppress any increase in room temperature, thanks to which further savings of energy/power are expected.

In addition to the standard “TACHIKAWA VENETIAN BLIND STANDARD TYPE”, the “TACHIKAWA VENETIAN BLIND STANDARD TYPE Aqua” standard type, ideal for your kitchen and bathroom, and the “TACHIKAWA VENETIAN BLIND STANDARD TYPE Aqua” tension type (requiring no fitting screws), mounted using compressing power without boring holes onto your tiled bathroom wall or the walls of your rented accommodation, are available for your selection. Select the ideal choice depending on the place of use.
